

Ultra Fog intervention inside the "Manica Lunga" library located on the island of San Giorgio Maggiore in Venice.

The libraries of the Giorgio Cini Foundation have over 300,000 volumes and represent an extraordinary instrument of study and research in the fields of history, art, literature, music, theatre, orientalism. The collections kept on the Island of San Giorgio Maggiore are highly specialized and traditionally linked to the activities of the Institutes and Centers in which the Foundation's scientific activity is divided. The spaces dedicated to the use of the library heritage are organized around the New Long Sleeve, which, together with the seventeenth-century Library designed by Baldassare Longhena and planned as a reading room.

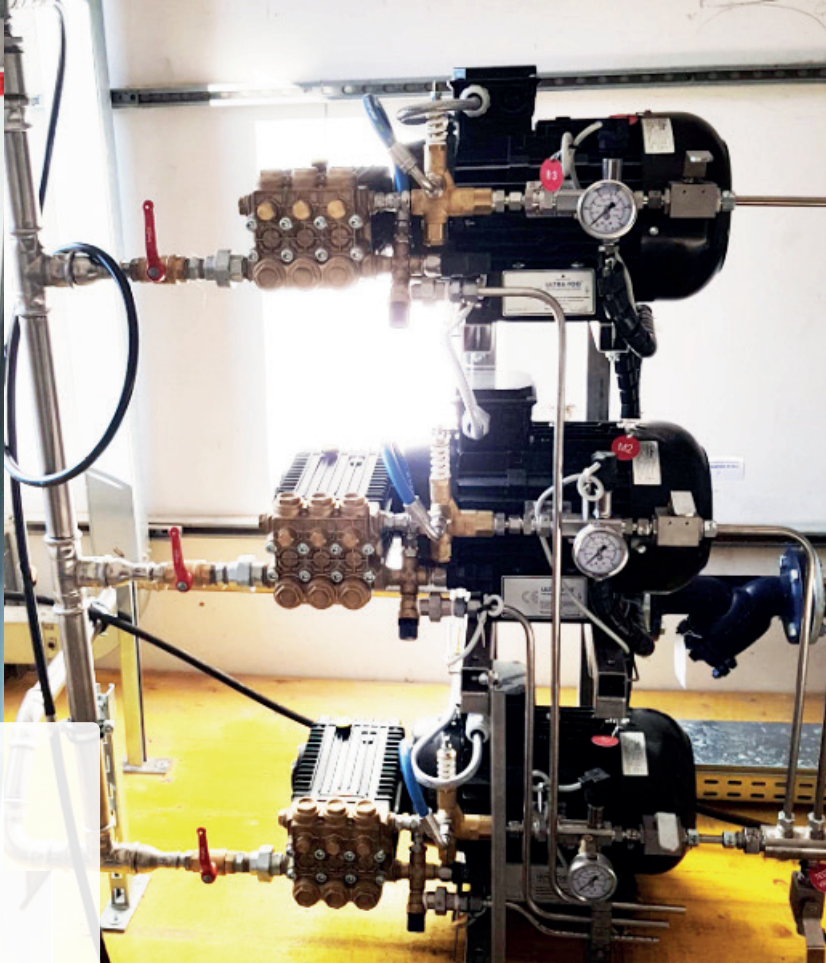

Advanced Water Mist
Fire Protection Systems Worldwide

Email: info@ultrafog.com
Website: www.ultrafog.com

Unique patented design with high performance for cooling effect and low consumption of water.

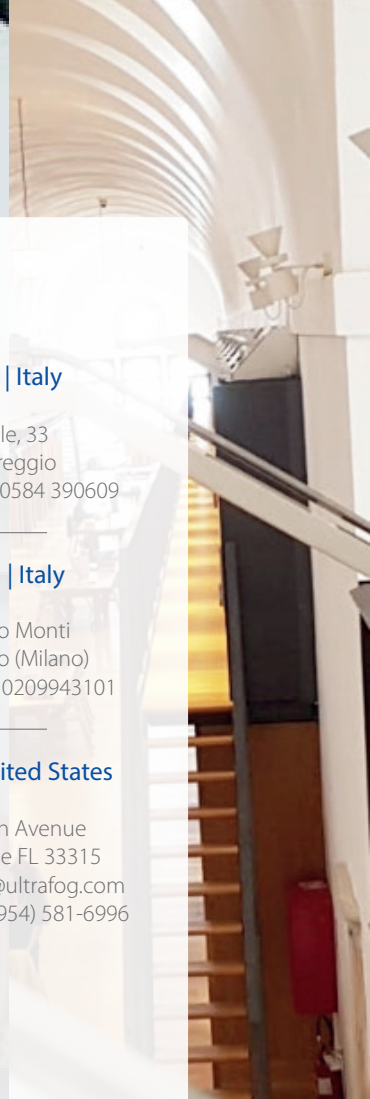

The intervention was intended for replacing the existing system with a new Ultra Fog water mist system.

The photos show various stages of the work, and it is of importance that the intervention was carried out without any limitation of access by operators and visitors from 7th of October to the end of December 2019.

ULTRA FOG[®]
FIRE EXTINGUISHING SYSTEM

As can be seen in some photos, our engineer is working in the presence of curious scholars inside the "Long Sleeve" library (150 meters long).

The second photo refers to one of the hoses replaced with stainless steel pipes of the new plant
